MUBASSHIR ALI

Software Engineer | Full-Stack & AI-Integrated Systems

+91 70031 51313 | mubasshirali0710@gmail.com | Bengaluru, India | linkedin.com/in/mubasshir-ali0710 | github.com/MUBASSHIRALI0710

PROFESSIONAL SUMMARY

B.Tech Computer Science graduate with hands-on experience shipping a production, subscription-based SaaS product end-to-end — architecting backend systems, integrating payment gateways, and deploying LLM-powered browser-automation agents. Strong full-stack foundation in React.js, Node.js, and REST API development, paired with practical experience across the Python ML ecosystem (Scikit-learn, Pandas, NumPy). Solid grounding in Data Structures & Algorithms, Statistics, DBMS, and Operating Systems. Looking to contribute as a Software Engineer on full-stack or AI-integrated product teams.

EDUCATION

Maulana Abul Kalam Azad University of Technology, West Bengal
Bachelor of Technology in Computer Science & Engineering | **GPA: 8.57/10**

EXPERIENCE

AiKing Solutions *Aug 2026 – Present*
Next.js Developer Intern

- Own full-stack development of **NanoBrowser SaaS**, a subscription-based AI browser-automation Chrome extension built on an open-source base; architected the backend with Node.js, TypeScript, Express.js, and MongoDB.
- Integrated the Razorpay payment gateway across a 3-tier subscription model, including webhook-based billing events and a fully verified end-to-end checkout flow.
- Led migration of core LLM infrastructure from OpenAI to AWS Bedrock, integrating Amazon Nova Lite for tool-calling-based browser automation agents.
- Implemented JWT authentication and Zod schema validation across backend APIs; conducted phased security audits and resolved critical and high-severity findings.
- Owned the deployment pipeline — MongoDB Atlas production setup and backend deployment on Render — alongside Chrome extension builds and end-to-end testing.

PROJECTS

NanoBrowser SaaS – AI Browser Automation Extension Github
Node.js, TypeScript, Express.js, MongoDB, AWS Bedrock, Razorpay

- Built a commercial, subscription-based SaaS product on top of an open-source AI browser-automation tool, letting users run LLM-powered browser agents without supplying their own API key.
- Designed a Planner/Navigator agent architecture (Amazon Nova Lite via AWS Bedrock) automating LinkedIn Easy Apply workflows, paired with Razorpay subscription billing and webhook-driven payments.

AI Refund Support Agent Github
Next.js 15, React 19, Node.js, Express.js, Groq LLM (function calling)

- Built an AI agent that handles e-commerce refund requests end-to-end — validating orders against 6 policy rules and auto-approving, denying, or flagging high-value orders ($500+) for review.
- Operated strictly through 7 tool-calling functions with a backend verification layer preventing ineligible refunds even under adversarial input (7/7 test scenarios passed); built a real-time admin dashboard showing the agent's reasoning chain.

AttendPro – Smart Attendance Management System Github
React.js, Node.js, Express.js, MongoDB, JWT, Tailwind CSS

- Built a full-stack attendance system with CRUD operations, date-wise tracking, search/filtering, and duplicate roll-number validation.
- Created responsive dashboards with attendance analytics and interactive charts; implemented JWT auth and protected routes, deployed on Vercel/Render.

AI-Based Diabetes Prediction System Github
Python, Scikit-learn, Flask, Render

- Built an end-to-end ML pipeline — data preprocessing, feature engineering, SVM model training, and evaluation — integrated into a Flask REST backend for real-time inference, deployed on Render.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, C++, SQL
- **Frontend:** React.js, Next.js, Redux Toolkit, Tailwind CSS, HTML5, CSS3
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication, MVC Architecture
- **Database:** MongoDB, MongoDB Atlas, MySQL, PostgreSQL
- **Cloud, Payments & Tools:** AWS Bedrock, Razorpay, Vercel, Render, Netlify, Git, GitHub, Postman
- **Machine Learning & GenAI:** Scikit-learn, Pandas, NumPy, Model Training & Evaluation, Prompt Engineering, LLM Tool-Calling / Function Calling (Groq, AWS Bedrock), Agentic Workflows
- **Core CS Foundations:** Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Computer Networks

CERTIFICATIONS

- Legacy Responsive Web Design — freeCodeCamp (2026)
- C++ Data Structures & Algorithms — Coder Army (2025)

ACHIEVEMENTS & EXTRACURRICULARS

- Solved 200+ DSA problems on LeetCode.
- Participated in the 2023 NASA International Space Apps Challenge (57,900+ participants, 152 countries) as part of a competing team.
